Whenever you wake up in the morning,

We could always be

F           G           Am
Take take take it all away

There's nothing left to say
 G          Am      C
Now I feel remorse
F           G           Am
Take take take it all away

And the pain is just too real

     C                      F
But you are everything I want
                  Am
```

```
And everything I need
                          G
It's all because of you
```

Chorus:
```
       C                    F
But you are everything I want
                    Am
And everything I need

It's all because of you
G
I could barely breathe
F                       C
Whenever you wake up in the morning,
                  F
It's a brighter day
                    Am
We settle the high seas
                    G
Cause baby you and me,

We could always be
F
I just wanna call you mine
